Education

Pennsylvania State University, University Park, PA: Aug 2023 - May 2027

- Geography: Bachelors of Science
- Minor in Geographic Information Science, certificate in Geospatial Big Data
- Honors and Awards: Phi Eta Sigma Honor Society, dean's list all semesters, Carl and Veronica Stravinski Scholarship, College of the Liberal Arts Scholarship

Experience

GeoGraphics Lab - Cartography Intern: Jan 2025 - Current

- Design maps for a wide variety of clients, including but not limited to maps supporting research in Africa, trail maps for a summer camp, visitor center reference maps for nature, figures for a research publication, and logo redesign.
- Communicating directly with clients to get feedback on projects and provide status updates on projects.

Pennsylvania Environmental Council - Trail Mapping Intern: Oct 2025 - Sept 2026

- Export and process spatial data from ArcGIS Pro for integration with a public facing web platform.
- Contribute to the launch of a trail discovery platform, supporting efforts to connect users with more trails.
- Partner with trail managers to gather feedback, and ensure accuracy on their trail profiles, and use feedback to form revision to ensure accuracy of the web page.

TRC - GIS Intern: Jun 2026 - Aug 2026

- Produced map series for 100+ projects in ArcGIS Pro for early phase environmental engineering projects (mostly oil & gas, power distribution, solar). Supporting primarily environmental permitting preparations.
- Digitized and georeferenced engineering diagrams to incorporate historical data to current GIS projects.
- Sourced and geoprocessed parcel data, symbolized map deliverables to project manager specifications, and incorporated feedback from project managers through collaborative iterative revisions.
- Balanced multiple concurrent projects against tight deadlines, consistently delivering client-ready maps.

University of Wisconsin - Conservation Intern: Jun 2025 - Aug 2025

- Collaborated with Wisconsin DNR, Wisconsin Association of Manure Applicators, and a variety of extension agencies to gain access to data and evaluate data regarding manure spills from diverse sources to build a comprehensive centralized dataset of manure spill events.
- Extracted spatial elements of the data to create cartographic products using ArcGIS Pro and Adobe Illustrator to highlight statewide spill distribution and frequency.
- Researched and processed ~ 500 unique manure spill events across Wisconsin to understand root causes of the event, and the associated environmental impacts.

Penn State Extension - Undergraduate Research Assistant: June 2024 - May 2025

- Processed laboratory data and utilized ArcGIS Pro and Python to develop GIS visualizations for 30 webinars and articles, enhancing data presentation and accessibility.
- Managed surveys sent to stakeholders, analyzed responses, and compiled results used in extension publications, contributing to informed decision-making and outreach strategies.

Penn State University - TA Roles

- Geography 6N | Fall 2026
- Geography 361| Fall 2025
- Soil Science 102 | Fall 2024
- Agri. Economics 101 | Spring 2024

Research

Water Quality Monitoring of Road Side Springs Across Pennsylvania August 2024-Current

- Conducted essential field work for collection of water sampling data.
- Lead efforts to draft, write, and revise an academic publication based on the data collected.
- Responsible for running a land use analysis of the locations sampled using a variety of GIS softwares.
- Presented this research at the following conferences: Penn State Water Conference, PIERS conference, Penn State Undergraduate Research Exhibit, UCOWR Conference

Skills

- **Geospatial:** ArcGIS Pro, ArcGIS Online, QGIS, Python, R, Arcade
- **Design:** Adobe Illustrator+Photoshop+InDesign, Affinity, Blender, Cannon Plotter Printing
